Besides the new songs performed at this show, there are more previously unreleased songs being performed on this tour: Leave Me Alone (an outtake on the new Matador *Underwater Moonlight* re-release), Each of Her Silver Wands (from *Mossy Liquor*), Soft Boys versions of Airscape (from *Element of Light*), Sleeping With Your Devil Mask (from *Globe of Frogs*), City of Shame (appearing on *Uncorrected Personality Traits*) and maybe others.

“ in fact the real thing to bootleg nowadays is the soundchecks and talking about bootlegs one of the really great things about this tour has been meeting the bootleggers, for example Ferris who gave me the missing tracks from Washington and we’ll put them up on the site soon ... it is such bullshit, this precious "you are raping my creative vision stuff" - bootlegging mp3's is nothing to do with records and it is not napster, it is a whole new area, or rather a whole old one, since the Grateful Dead (as someone pointed out backstage tonight) - we definitely do not mind I mean, this is only making permanent what would otherwise be up in smoke - JOIN IN, get the message ... all the creeps are is people who charge money for bootlegs because that is not the point either except us, because we can!
